Know Your Campus Health Center!

In order to effectively mobilize to ensure that your campus health center policies provide for comprehensive reproductive health services, your group must “know your campus health center!” Use the following questionnaire as a guide to conducting research on your campus health center’s services for women. The information you gather through this survey will help direct your efforts to increase health services for women on campus. Once your group has completed this survey, you will be ready to plan a successful campaign!
